SUMMARY

Product and program manager with 5+ years turning messy, cross team problems into shipped work, most recently as a Technical Product Manager at LG Energy Solution Vertech and before that running enterprise migrations at Dell for clients like GE Aerospace and NBN. Equally comfortable writing the requirements and holding the schedule that delivers them, and ready to own that full arc on a larger product or program team.

SKILLS

Product: Product Discovery, Product Requirements Documents, Roadmapping, Voice of Customer Research, Prioritization, Minimum Viable Product Definition, User Stories, Backlog Management, Prototyping, User Acceptance Testing, Release Notes, Competitive Analysis

Program & Project: Stakeholder Management, Cross Functional Delivery, Risk Management, Change Management, Vendor Management, Resource Planning, Budget Management, Process Improvement, Root Cause Analysis, Status Reporting, Governance, Return on Investment

Technical: Python, SQL, APIs, Amazon Web Services, Cloud Migrations, VMware, Git and GitHub, Large Language Models, Generative AI, Data Analysis

Tools & Methods: Agile, Scrum, Kanban, Jira, Confluence, Asana, Smartsheet, Trello, Figma, Tableau, Power BI, Visio, SharePoint, Microsoft Project

PROFESSIONAL EXPERIENCE

LG Energy Solution Vertech — Technical Product Manager (Co-op) Jan 2026 – Aug 2026

- Drove **zero to one** discovery for a new Warranty Tool, writing the product requirements document and steering it through the ToolGate governance process.
- Ran **voice of customer** interviews with internal and external users, then ranked the pain points that set scope for the first release.
- Built an **AI powered** site health reporting workflow that pulls data from several teams and uses an **LLM** to surface recommended actions.
- Prototyped features in **Figma** with engineering and design, and wrote release notes across the **SaaS** suite for customer facing teams.

Dell Technologies — Associate Consultant, Program Manager Feb 2022 – Aug 2024

- Held **99.9%+** business continuity across **3,000+** enterprise systems by owning migration roadmaps and aligning cross functional teams.
- Won **\$500K+** in follow on work running GE Aerospace's mission critical migration, with round the clock monitoring and early risk escalation.
- Protected **\$1M+** in client retention by delivering NBN's six event workload migration in **90 days** across time zones and vendor teams.
- Cut manual migration effort **50%** and lifted customer satisfaction **35%** with **Python** automation and standardized runbooks.

Tata Consultancy Services | Google — Product Specialist Jan 2021 – Feb 2022

- Hit **95%** sprint completion and **25%** faster delivery on the Google YouTube TV workstream by running it on **Agile Scrum**.
- Improved design consistency **60%** by standardizing the design to production workflow and training **25+** team members on it.
- Shortened time to market **30%** by leading a cross functional program tracked in **Jira**.

Accenture — Technical Support Specialist Dec 2019 – Dec 2020

- Passed **100%** of audits across hundreds of company assets by tightening compliance controls and closing gaps before review.
- Resolved **95%** of compliance and Microsoft application issues, lifting client satisfaction and reducing device risk.

PROJECTS

Check Mate — [AI Market Intelligence Platform](#) May 2026 – June 2026

- Built an **AI powered** market intelligence platform in **Python** and **Streamlit** that scans **8** industry domains and sorts articles by competitor, innovation, and policy signal.
- Automated the full collect, classify, and publish pipeline on **GitHub Actions**, committing a database that redeploys the live dashboard without a person in the loop.
- Engineered a multi provider **LLM** pipeline with automatic failover on rate limits and API errors, so classification keeps running on free tier keys.
- Shipped an Ask AI feature for plain language querying, plus a weekly **Top 3** email digest ranked on geography, impact, and recency.

EDUCATION

Northeastern University	<i>December 2026</i>
Master of Science in Information Systems	<i>Boston, MA</i>
Visvesvaraya Technological University	<i>August 2019</i>
Bachelor of Engineering in Computer Engineering	<i>Bangalore, India</i>
